**Key words:** errata – addenda – polarization – instrumentation: polarimeters – methods: observational – celestial mechanics – Earth – Moon.

This is a correction notice for ‘Celestial mechanics and polarization optics of the Kordylewski dust cloud in the Earth–Moon Lagrange point L5 – I. Three-dimensional celestial mechanical modelling of dust cloud formation’ (DOI: <https://doi.org/10.1093/mnras/sty2049>), which was published in *MNRAS* 480, 5550–5559 (2018). The publisher regrets to inform that there was a mistake in the abstract due to a collation error. The incorrect sentence read: ‘However, in 1961, the Polish astronomer, Kazimierz the Polish astronomer, Kazimierz Kordylewski found two bright patches near the L5 point, which might refer to an accumulation of interplanetary particles.’ It should instead have read as follows: ‘However, in 1961, the Polish astronomer, Kazimierz Kordylewski found two bright patches near the L5 point, which might refer to an accumulation of interplanetary particles.’ This has been corrected online. The publisher apologizes for this error.
